What to prepare

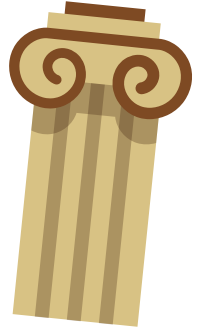

Knowledge

Make sure you know what you're asking about. Think about your intentions so you can craft questions that'll give you meaningful responses.

Skill

Pay attention when someone gives you an answer or explains. After that, formulate questions that build on the information shared.

✦ 03

How to approach

Brainstorming

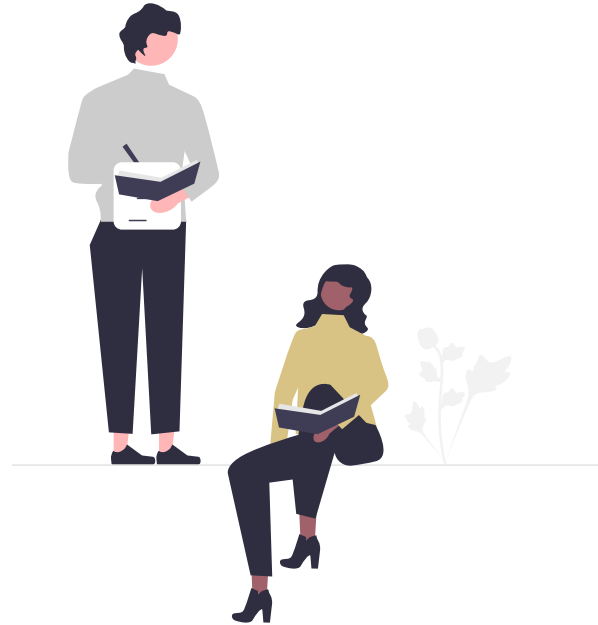

A good question stimulates critical thinking and prompts the respondent to reflect or delve deeper into the topic.

Brainstorming assists in evaluating whether the question is effectively communicated, clear, purposeful, etc., ensuring it is sufficiently structured to extract the desired information.

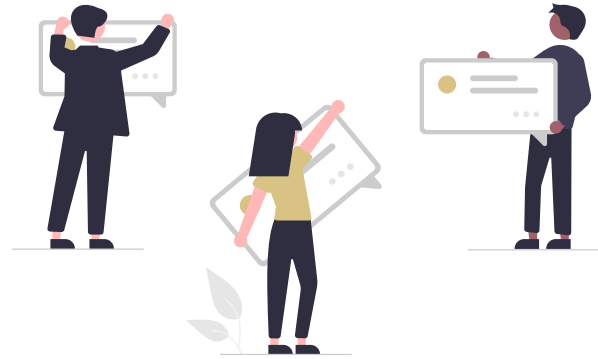

Provide Context

Offer relevant background information to help others understand the context of your question.

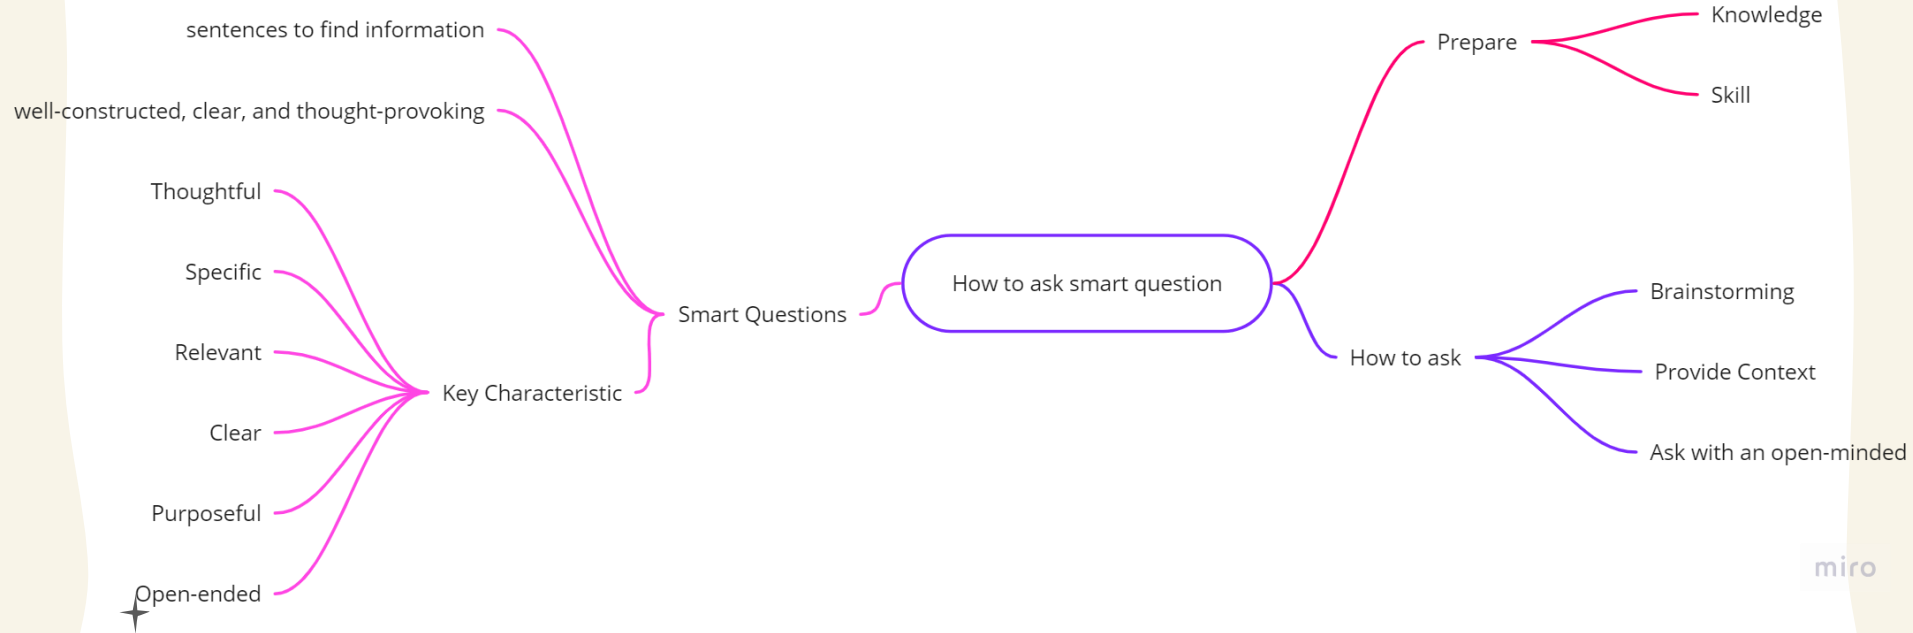

Ask questions with confidence, politeness, and an open mind.

Confidently and politely pose your questions, maintaining an open-minded attitude to encourage constructive dialogue.

Mind map

Thanks!
